

XM Radio is a phenomenal service that my personal household pays for. XM provides very useful information that every subscriber has the right and reason to hear and XM has every right and reason to broadcast great channels such as local traffic and weather. XM Radio offers quality, quantity and variety that normal everyday radio stations DO NOT broadcast. I pay for this wonderful service, I enjoy it, my family enjoys it and with all due respect, I expect the right thing to be done and that is for NAB'S petition 04-160 to be fully rejected as it should be and for wonderful satellite services such as XM Radio to continue to provide myself and my household the programming that I subscribe to and deserve. Thank you!
